

JANUARY 2018

Main Line Express

Happy New Year! We'd like to welcome our new Water Education and Communications Coordinator, Jessica Salinas, to MPU. She brings many years of educational experience and will be conducting presentations for schools, groups and the community on water conservation and water processing techniques.

Water Education is very important to MPU, which is why we host a variety of free camps throughout the year. We ended 2017 with an exciting Winter Waterland Camp that engaged 3rd-5th graders with STEM activities ranging from aquatic life and chemistry, to design challenges and the water cycle. We encourage you to sign up your kids for upcoming camps. Limited space is available. For more information, visit mcallenpublicutility.com.

GIRLS LOVE STEM

FEBRUARY 3, 10, 17, & 24
9AM-11AM

Have fun every Saturday in February in this camp designed for girls ages 11-14.

MARCH MADNESS

MARCH 12-16
8AM-12PM

Become junior scientists and discover the properties of water with fun, interactive learning experiences for 3rd to 5th graders.
